

The 2-Week Get-Online Checklist for Home-Service Pros

The things your business needs online to get found, trusted, and called - without the tech headache. This is the exact audit we run before building any client site.

1 GET FOUND

- ☐ **You have a real website - not just a Facebook page**
A Facebook page does not show up when someone Googles "handyman near me" at 8pm.
- ☐ **Your Google Business Profile is claimed and filled out**
Free, and the #1 way local customers find trades. Most pros never claim it.
- ☐ **Your name, address, and phone match everywhere**
Mismatched between Google, Facebook, and your site quietly sink your search ranking.
- ☐ **Your service area and services are in plain words**
"Drywall repair in Levittown" beats "quality craftsmanship" every time.

2 BUILD TRUST (IN 5 SECONDS)

- ☐ **Photos of YOUR actual work - before/after beats stock**
A real phone photo of a job you did out-converts a glossy stock image.
- ☐ **3+ reviews visible on the page**
People trust other customers, not your description of yourself.
- ☐ **A clear list of what you do (and do not) do**
- ☐ **A face or a name - people hire people, not logos**
- ☐ **It looks current - not last updated in 2015**

3 GET THE CALL

- ☐ **Your phone number is tap-to-call on a phone**
70%+ of trade searches are on a phone. Make them copy-paste your number and they are gone.
- ☐ **A "Get a Free Quote" button above the fold**
- ☐ **A simple contact form that actually sends**
More sites than you would think silently drop every message. Test yours today.
- ☐ **The site loads in under 3 seconds on mobile**
- ☐ **One clear next step - not five competing buttons**

The 60-Second Test

Pull out your phone and search your business the way a customer would. Can you find it? Does it load fast? Can you tap to call in one thumb-tap? If you hesitated on any of those - that is a job walking to a competitor.

Do not want to do all this yourself?

We build a complete, phone-ringing website for home-service pros - done in about 2 weeks, flat \$799. No retainer to find out if it is a fit.
